

2M PREAMBLE

QST, QST, QST

Good evening, this is (first name), (call sign), in Florence, Oregon. I am net control for this session of the Central Oregon Coast Amateur Radio Club. We meet each Wednesday night at 7PM local time on 146.800 MHz.

This net is open to all licensed amateurs, the purpose being to provide a source of information for our local members regarding club activities, board meetings, and any other special events our club is involved in.

While this repeater is normally open for public use, at times of declared emergencies the repeater will revert to emergency use only and will be under net control for the duration of the event. Members are encouraged to use 146.52 MHz or 446.00 for communications so as not to interfere with emergency communications.

When using the repeater or on simplex, remember to identify with your call sign at least once every 10 minutes during a QSO and at the end of your conversation.

Are there any announcements?

Is there anyone needing an early out? Come now with name and call sign.

Do we have any Echolink check-ins this evening? Announce you call sign only and wait for a response from net control.

2M PREAMBLE

Does anyone have equipment for sale or want to buy ?

We will now go to member roll call:

(Call Roll, call sign and first name)

Any late or missed members?

Are there any visitors within range that wish to check in? Name, call sign and location please.

Thanks to everyone for checking in tonight. I am now returning the repeater to normal use. 73 to everyone. This is K7FMM and I'm clear.
